Engineering & Technology

# Directorate of INDUSTRIAL LIAISON

*"Collaborate, Innovate, Transform"*

**ACADEMIA - INDUSTRY - GOVERNMENT  
Partnerships!**

## About Us

The Higher Education Commission's (HEC) flagship initiative, the Academia-Industry-Government Linkages (Triple Helix) platform, is designed to foster collaboration between scientists from Pakistani institutions and professionals from industry and government. Fostering this significant endeavour of HEC and the Vision of NED University of Engineering & Technology, the Directorate of Industrial Liaison (DIL) was established in 1997, pursuant to DIL's vision and mission as follow:

### Our Vision

"Bridging Academia, Industry, and Government to cultivate skilled professionals, and foster a vibrant ecosystem for sustainable socio-economic impact, aligned with the UN-SDGs."

### Our Mission

To serve as a vital bridge among academia, industry, and government, catalyzing students' seamless transition into professional realms and technological progress by offering insightful industry visits, extensive internship opportunities, comprehensive career counseling, mentorship, stimulating final-year design projects, effective job placement services, fostering collaborative avenues for research and development initiatives.

# CORE FUNCTIONS of DIL

Creating a dynamic and productive ecosystem for knowledge exchange and innovation, the Directorate of Industrial Liaison (DIL) aims to develop and strengthen essential industry-university linkages through a variety of activities.

## Faculty Industrial Placement Programme (FIPP)

DIL cordially invites industries to consider taking part in our FIPP. Faculty members of NED may be able to spend their two to three-month vacation time embedded in the industry through this programme. This firsthand experience not only enriches faculty's teaching methodologies but also enables them to better prepare our students for the demands of the ever-evolving job market.

“Collaborate, Innovate, Transform:  
Academia, Industry, Government  
Partnerships!”

# Industrial Services

## One Window Operation

As part of the Directorate of Industrial Liaison's commitment to strengthening the academia–industry–government nexus under the Triple Helix Model, DIL is pursuing a key initiative outlined in NED University's Strategic Plan for the next five years. To achieve this objective, DIL has adopted a three-phase implementation model. The first phase involves the establishment of an Industrial Services Gateway through a **“One-Window Operation”** portal system. This initiative aims to promote institutional self-reliance by streamlining digital communication and coordination with industry. The portal will function as a centralized platform to facilitate structured engagement with industrial and government entities. Services include; industrial training, lab testing, consultancies, R&D efforts, and MoUs etc.

# Cooperative Education (Co-op) Programme

DIL invites the industry to collaborate with NED's “Cooperative Education (Co-op) Programme”, and to consider accepting NED students as interns throughout their academic journey, from the first year to the final year, with the possibility of continued placement based on performance, especially during students' vacations.

Directorate of Industrial Liaison

# Career Fairs

It is a key event aimed at bridging the gap between students and potential employers, and provides a platform for graduating students to meet with employers, explore career opportunities, secure positions in various industries.

**DIL INVITES INDUSTRIES:** to collaborate in co-creating innovative solutions, developing future-ready talent, and advancing Pakistan's digital industrial transformation—contributing together to sustainable economic growth.
