COOPERATIVE EDUCATION PROGRAMME

The Cooperative Education (Co-op) Programme was introduced at NED University in 2017. It is a combination of classroom-based education with industrial placement across the duration of four years of studies. The conventional education system has a lack of appropriate correlation between academic curricula and industrial practices. Many employers train students before hiring them as graduate trainees for a specific period of time before they could start their jobs. Proper implementation of the 'Co-op programme' helps in bridging this gap. Students are able to undergo industrial training during their studies thereby making a smoother education-to-work transition. As a part of the Co-op education programme, nominated students from the university on the basis of merit do industrial placements during their semester breaks from first year till the time of their graduation.

Partner Organizations in NED University Co-op programme are:

systems

Directorate of Industrial Liaison (DIL) During Year 2023-24

Some of the organizations with whom Directorate of Industrial Liaison remained engaged during the past year for job placements and recruitments
